

VS COBOL 85

Release 03.01.03

November 1999

INTRODUCTION

The Wang VS COBOL 85 compiler validates and translates source programs written in the ANSI Standard COBOL 85 language, producing a program file that executes on any Wang VS system.

PROBLEMS CORRECTED IN 03.01.03.

CTS #	Description
E142587	The use of the HOLD EXTENSION-RIGHTS no longer causes a PC04 failure.
E138011	The ACCEPT DATE4 statement now works for all dates of the month. An error in assigning internal storage was determined to be the problem.
