

Year 2000 Statement of Compliance

Product Name: VS Printers

Introduction

Wang has manufactured and/or sold numerous printer products for use on the VS. This compliance statement references printers manufactured by Wang or manufactured by others and labeled as Wang Printers. It does not include third party printers sold by Wang.

This statement is provided in response to customer requests for product Y2K compliance Statements.

Definition

For the purposes of this statement only, Year 2000 **compliance** means that neither performance nor functionality of a product is affected by dates prior to, during and after the year 2000. In particular-

Rule 1 - No value for current date will cause any interruption in operation.

Rule 2 - Date-based functionality must behave consistently for dates prior to, during and after year 2000.

Rule 3 - In all interfaces and data storage the century in any date must be specified either explicitly or by unambiguous algorithms or inferencing rules.

Rule 4 - Year 2000 must be recognized as a leap year in terms of handling both the 29th of February and day 366.

For the purpose of this statement, Year 2000 **certified** means that Wang has examined or tested a specific release of the software and has determined that it is year 2000 compliant. In some cases, known exceptions or limitations may be stated.

General Statement regarding Wang VS printers

Except for the specific models listed below, Wang printers are not date aware. They do not process, store or use dates in any internal operations. In this context, Wang considers these printers Y2K compliant.

This statement applies to Wang Daisy Wheel Printers, Wang Matrix Printers, Wang Band and Chain Printers and Wang Laser Printers.

The exceptions are Wang Print System 30, an obsolete image printing system. This printing subsystem used an included personal computer to provide formatting and logging functions, and some logging functions may not work as expected after Y2K.

Effective Date: December 15, 1998
