

Year 2000 Statement of Compliance

Product Name: Wang Branded Uninterruptible Power Supplies (UPS)

Introduction

Wang Global has sold Uninterruptible Power Supplies (UPS) manufactured by several vendors and labeled as Wang product for use on Wang VS systems and/or other computer uses. Wang has also sold UPS systems from other suppliers using the suppliers brand names. Various Wang subsidiaries have also sold locally procured UPS systems using the Wang label.

This statement is provided in response to customer requests for product Y2K compliance Statements.

Definition:

For the purposes of this statement only, Year 2000 **compliance** means that neither performance nor functionality of a product is affected by dates prior to, during and after the year 2000. In particular-

Rule 1 - No value for current date will cause any interruption in operation.

Rule 2 - Date-based functionality must behave consistently for dates prior to, during and after year 2000.

Rule 3 - In all interfaces and data storage the century in any date must be specified either explicitly or by unambiguous algorithms or inferencing rules.

Rule 4 - Year 2000 must be recognized as a leap year in terms of handling both the 29th of February and day 366.

For the purpose of this statement, Year 2000 **certified** means that Wang has examined or tested a specific release of the software and has determined that it is year 2000 compliant. In some cases, known exceptions or limitations may be stated.

General Statement regarding Wang UPS

In general UPS systems are not date aware. The general guideline that we can provide is that if the UPS does not provide a means for setting the date, then it is not date aware, and thus is Y2K compliant by the rules defined above.

If the UPS does not provide a communications port to connect to the host it will not be date aware. If it does, the probability is that the message traffic between UPS and host is limited to simple messages that indicate that external power is on or off, and if Off, indicate how much longer the UPS can provide power to the system. No date information is needed to provide the host with this information.

Effective Date: March 8, 1999
