

VS Web Server Services

Could you use some assistance in installing or implementing the VS Web Server on your VS system?

VS Web Server Services are available from Getronics!

VS Web Server Services

The VS Web Server is available at no charge subject to the acceptance of license terms and conditions. The VS user community will be encouraged to provide enhancements to and maintenance of the source code. Standard Getronics Software Support Services do not apply as a result. The Getronics VS web site (<http://www.VSWebCenter.com>) will be a likely source of information on available fixes, enhancements, and other information. The open-source model is new to Getronics. While we may not have all the answers for problems that are encountered as the source set of the Web Server evolves over time, we are determined to rise to meet the challenge.

VS Web Server Software Support

For those customers who have questions or problems during the installation, configuration, or operation of the VS Web Server, calls can be placed to the VS Support Center using the standard support center number (800-247-9264). These calls will be billable on a time and materials basis (\$265/hour - 2 hour minimum, \$200/hour - 2 hours minimum for VS systems under maintenance, standard business hours).

VS Web Server Installation Services

The physical installation of the VS Web Server is not complex, however if you wish onsite or remote telephone assistance for the installation and configuration of your VS Web Server these services are available on a time and expenses basis. Rates will vary based on whether the VS is under maintenance and whether remote or onsite support is requested.

VS Web Server Professional Services

If you wish assistance on creating an effective strategy for presenting VS based data to your clients and customers, this may require some expert assistance. Getronics' VS Professional Services Consulting Practice may be engaged by VS installations to provide assistance in implementing Web access to the VS.

VS Web Server Special Projects

You may have a requirement for a particular feature or special function not already present in the VS Web Server package. If you do not wish to assign your own development resources to affecting the necessary changes to the source code for the VS Web Server, we here at Getronics could be engaged to build those special features in to the VS Web Server package for you.

Availability and Pricing

The VS Web Server is available now!

Please contact Getronics for further details on Web Server Services and pricing.
