

VS Performance Audit Service

Is your VS System running optimally?

Will additional disk capacity improve system performance or do you need to upgrade?

A VS System Performance Audit is available!

VS System Performance Audit Services

It is important that your VS system runs at peak performance to keep up with today's demanding data processing requirements. As data loads change, and new jobs, peripherals, and procedures are added to the VS, it is easy for your VS system to develop bottlenecks over time. Getronics will be happy to help you identify those areas where a little tuning could go a long way!

The VS Performance Audit Service is designed to provide an analysis of all key areas of system performance:

- CPU
- Disk I/O
- Memory

The performance audit details specific areas where performance may be improved:

- Programs with high CPU utilization
- Batch-like programs run from workstations
- Disk with excessive queuing

Deliverables / Features

The results of the audit are summarized with specific recommendations in a formatted report. Telephone consultation is available to assist in implementing recommendations.

Data Collection Method

You collect the data using the VS System Activity Monitor (SAM) and send us the file created.

VS Performance Audit Benefits

The VS Performance Audit recommendations will provide the following benefits when implemented:

- Optimization of the VS System
- Increased system throughput

Prerequisites

- Valid Getronics VSOS and application software licenses
- Year 2000 compliant VS System software and hardware

Availability and Pricing

The VS Performance Audit Service is available now! Please contact Getronics for pricing and scheduling your VS Performance Audit.
