

*Getronics is pleased to announce a series of services to assist you in keeping your VS systems, VS applications, and VS data available for an extended period of time.*

---

## Customer VS Application Maintenance

---

Getronics can provide the outsourced remote maintenance of customer-developed VS applications. This offering is for customers who no longer have staff in place to maintain existing VS PACE, WIIS, or compiler-based applications that require corrections. Customers have the option of mirrored or direct remote access. With mirrored access, we will duplicate and install the application at Getronics for updating and testing purposes before moving it to the customer system. With remote access, the customer will need to provide remote access to their target system and modifications will be made directly on their system.

---

## Customer VS Special Projects

---

Getronics can provide the VS customer with the development resources necessary to perform the custom enhancement of Getronics/Wang-provided applications and system programs, as well as addressing specific development request for customer-developed VS applications.

---

## VS Data Recovery

---

Getronics can provide customers with VS magnetic/optical disk data recovery services. This services involves an evaluation of the media problem, a statement of the recovery capability relative to the specific media, and the technical work to recover the data to the fullest extent possible.

---

## VS Data Hosting

---

Getronics can provide the VS customer with the necessary environment to host their existing VS data, allowing the customer to access the data as required on a periodic basis. Backup protection, offsite storage, and remote access can be included as part of this service. Getronics will utilize in-house systems to provide the customer access needed, arranging for the availability on a case-by-case basis.

---

## Who Can Benefit

---

As customer's internal VS capabilities change, Getronics can provide the necessary system and technical resources to supplement the customer and keep the customer's VS environment operating as it has in the past.

---
